NEWS RELEASE 06-02

Additional Drill Targets Identified At Gossan's Bird River Sill Property

February 10, 2006 – Gossan Resources Limited (GSS-TSX.V & GSR-Frankfurt/Freiverkehr) is pleased to report that North American Palladium Ltd.'s wholly-owned subsidiary, Lac des Iles Mines Ltd. ("LDI"), has completed a ground geophysical program on the Bird River Sill Property. Crone Geophysics conducted the 37.8 line-km, deep penetrating, large loop, surface pulse DEEP EM survey along a 2.6-km strike length of the Bird River Sill on the Page and Peterson Blocks which identified several priority targets at or near the base of the Bird River Sill. A follow-up drill program is scheduled to be conducted in February and March, weather permitting.

LDI is following-up on its 2005 exploration program on Gossan's Bird River Property that included an 8-hole diamond drill program, totalling 934 metres. Drilling tested seven of the airborne electromagnetic conductors, identified from a helicopter-borne VTEM "dream catcher" survey flown earlier in the year. Four of the eight holes encountered significant sulphide mineralization highlighted by hole BR-05-02, located on the Page Block, that intersected 13.75 meters of 1.077% nickel and 0.501% copper including 4.75 meters grading 2.143% nickel and 0.440% copper. The results from the drill program were announced on August 8, 2005 in news release NR-05-11.

The Property, encompassing 6,870 hectares (16,975 acres), covers over 21 kilometres of the Bird River Sill Complex. Locally, about 500 to 600 metres thick, the Bird River Sill is a differentiated gabbroic complex, which trends east-west, dips steeply to the south and is subdivided into a basal ultramafic, a transitional and an upper mafic series. This complex carries significant concentrations of palladium and platinum along with nickel, copper, zinc and chromite. The Bird River Property is located about 40 km east of Lac Du Bonnet, Manitoba and, along the Sill, approximately 6 km west of Mustang Minerals' Maskwa Deposit.

Under the terms of an Option and Joint Venture Agreement, LDI can earn an undivided 50% interest in the Bird River Property by spending \$2.5 million on exploration and making cash payments of \$400,000 to Gossan by August 30, 2008. Thereafter, LDI can earn a further 15% interest by completing a bankable feasibility study and an additional 10% interest, to a total 75% interest, by arranging project financing. Under the terms of the Agreement, LDI must incur an aggregate of \$1,000,000 of exploration expenditures (including expenditures incurred to date) by August 30, 2006 and continue to make semi-annual cash payments of \$50,000.

North American Palladium Ltd. (PDL-TSX & PAL-Amex) is Canada's only primary producer of palladium and is the owner/operator of the Lac des Iles Mine located northwest of Thunder Bay, Ontario. Bruce W. Mackie, Vice President – Exploration of North American Palladium Ltd. is LDI's Qualified Person supervising the work being carried out on the Bird River Property

Gossan Resources Limited is engaged in mineral exploration in Manitoba and northwestern Ontario. It has a well-diversified portfolio of properties hosting gold, platinum group and base metals, as well as the specialty metals, tantalum, chromium, titanium and vanadium. The Company also has a large deposit of magnesium-rich dolomite and a silica sand prospect. Gossan trades on the TSX Venture and the Frankfurt/Freiverkehr & Xetra Exchanges and has 19,630,901 shares outstanding (25,313,678 shares fully diluted).
